IBC Project: Mapping color center

In this experiment, you have to tell when a previously appeared image is repeated. Following is an example of what a run might look like:

1. A fixation cross appears at the start of each run and is present throughout the experiment. Try to fixate on this cross.

2. Then, a series of similar images will appear rapidly on the screen. It could be a series of colored images or gray-scale images, as shown below:

OR

3. Your task would be to quickly press a key when an image appears again.

For example,

Press the index finger key during scan and 'y' during practice session.

Each run of this task is about 8 minutes long and you will perform it four times.
